Vacancy

Design Engineer for Ballast Water Treatment Systems and Scrubber Retrofits

Reporting to the Project Manager and Technical Manager

- Preparing 2D & 3D structural and piping drawings with the use of AutoCad, SolidWorks Plant 3D or any other similar software
- Contribute to the correct and timely preparation of the engineering and design retrofits projects
- Executing special engineering tasks and projects
- Willing to visit vessels abroad for 3D scanning

The successful candidate will have proven track records in similar studies and projects as described above with at least a year of experience in the field. Knowledge in Finite Element Analysis (FEA), modeling and retrofits will be further considered as additional qualifications.

A competitive salary package is available for the successful candidate.
