

KEEP ABREAST WITH DEVELOPMENTS IN THE NEWBUILDING SECTOR

AMC NEWS
DECEMBER 2020/TECH/66

Alpha Marine Consulting (AMC) is pleased to announce winning new contracts with leading Greek and North European Shipping companies for the plan approval of a series of 38k m3 LPGCs to be fitted with hybrid scrubbers, 115K Aframax, 156K Suezmax and 6,000 DWT Dual-Fuel Chemical Oil Tankers. Owners' intention is to utilize AMC's experience in both Newbuilding and Scrubber engineering sectors to exploit niche technical background, as accumulated by the firm in similar projects.

Alpha Marine Consulting aims at developing and contributing into a vessel which will satisfy both Regulatory and Buyers requirements, as well as Industry's Best Practices. For achieving this, use is being made of the firm's experience with numerous new-buildings and conversions, covering a wide range of vessel types such as Container Vessels, Product / Chemical Tankers, Oil tankers, LPG/NH3 carriers, Asphalt tankers, Bulk Carriers, General Cargo Ships, Passenger Ships, etc.

Our broad experience in the wet sector gained through our involvement in numerous TMSA compliance projects, Vetting Inspections, NBs and many other operational aspects related to the tankers industry, is directed into all our NB projects providing additional value to the Buyers investment. Our data-base of approx. 14,500 vetting observations is used for ensuring compliance with Oil Majors operational requirements which are embodied into the design phase of the Plan Approval project.

The firm has undertaken the design evaluation, specification review and plan approval of almost all types of tankers, gas carriers, container ships and bulk carriers while the services are also extended to include the preparation of tender documents, tender evaluation, contract negotiations and Supervision during construction.

Our NB Team is available to assist for any inquiries on your current and/or forthcoming NB projects.
