

# VETTING & TANKER INSPECTION TRAINING COURSE

23 - 24 October 2014

Alpha Marine Training Center, 4th floor, 55, Kastoros str., Piraeus

Dear Sirs,

We are pleased to announce that Alpha Marine Consulting will carry out a two-day course on "VETTING & TANKER INSPECTION". The course will be delivered by a well-respected vetting professional, Mr. Sebastiano Bramanti, who is an active SIRE inspector (OMV) and has many years of experience in conducting vetting inspections.

The "workshop" will provide to Tanker companies commercial and technical personnel, superintendents, vetting officers, shipmasters and seagoing officers, a deeper understanding of the OCIMF Ship Inspection Report (SIRE) Program as well as skills to deal effectively with tanker vetting and enhance the handling of inspection processes.

The course will combine lectures and presentations with practical exercises to raise awareness of issues that are critical to oil companies and the inspectors who undertake SIRE inspections. Action plans to efficiently rectify shortcomings revealed during inspections will be also addressed. Finally, the importance of following-up an inspection and especially the way to manage inspectors' observations and the methodology of writing effective responses will be covered.

The training cost per trainee is 250 € including handouts and light lunch.

Delegates will receive a certificate upon successful completion of the course.
